

STC Model CS20 Self Unloading Truck Beds

STC live bottom truck beds offer more options than any other commodity bed on the market. Our patent pending vertical sliding door offers the newest and most innovative design ever seen in a truck bed. Not to mention we are the only manufacture to offer chain flap belt or double drive solid belt, plus a full swing tailgate option. Only the best available components and materials are used in the construction of our beds. Our unique designed STC bed offers a stronger and more durable bed, which means a longer more useful life span. For more details visit us online at www.stctrailers.com or call 208-785-1369

Our patent pending vertical sliding side door is unlike any other commodity bed on the market. This door allows for over the side loading of potatoes and other produce that is susceptible to bruising and damage when harvesting. Once the bed is loaded, the door locks safely in place. STC is the only company that offers either chain flap or solid belt double drive unloading system. Not to mention our carry rollers in the solid belt can be changed without unlacing the belt. We are also the only company to offer the option of a full swing tailgate on a chassis mount bed.
